Summary

I am a self taught full stack developer, creating functional websites and web applications.

I specialize in JavaScript, and mainly work with React to create beautiful and seamless user interfaces and experiences alongside SASS for the frontend, as well as creating custom, reusable components for future projects.

I also use PHP and Python to create scalable, reliable, and performant backend systems alongside Node, as well as working with APIs (using pre-existing ones, and building REST APIs from scratch).

I practice using the Agile methodology (Scrum) in my individual projects to streamline workflow and maintain cohesion and clarity.

PREFERRED STACK: MERN (MongoDB, Express, React, Node)

I also have prior experience with Graphic Design in Photoshop, and UI/UX Design/Prototyping in Photoshop & Illustrator.

Experience

Frontend Developer

Bandung Independent School

Nov 2015 - Dec 2015 (2 months)

Created a website for my school's TEDx event. The website is no longer running, but the event description can be found in the links below. There is also a link to an archived version of the site.

Made using vanilla HTML5/CSS3 and JavaScript.

Education

Monash University

Higher National Diploma, Information Technology

Oct 2017 - May 2018

Studied for a year. Dropped out due to financial circumstances.

Bandung Independent School

International Baccalaureate Certificate

Aug 2010 - May 2017

Graduated with an IB Certificate.

Higher Level subjects:

- English

- Economics
- ITGS

Standard Level subjects:

- Physics (Astrophysics specification)
- Mathematics

Other subjects:

- Mandarin (High School Diploma)

Notable achievements:

- Developed and deployed a landing page for a client as part of my final ITGS project. Technologies used: HTML5/CSS3, JS
- Was part of the IISSAC swim team for a year, participated in the annual interscholastic swim tournament.
- Won the first official Ultimate Frisbee match against British School Jakarta.

Notable Personal Projects:

- Designing uniforms for the IISSAC Basketball Team
- Snapchat Geofilter
- Designing the Earth Day 2015 Tote Bag
- Designing and developing the TEDxBisBandung website
- Designing a logo and poster for Valentine's Day
- Creating T-Shirts to sell for a Movember-based charity
- Created an extra-curricular activity with peers based around a popular video game (DotA 2)

Licenses & Certifications

Surf Lifesaver Certification - SPORA Sekolah Pengembangan Olahraga Air

Skills

JavaScript • MERN Stack • PHP • Python (Programming Language) • HTML • Cascading Style Sheets (CSS) • SASS • REST APIs • jQuery • Problem Solving
